SUMMARY

A seasoned front-end focused software developer with over 15 years of experience working in various industries such as large to mid-size consulting companies and banking. I am a highly results-oriented and versatile professional who excels in developing and implementing mission-critical solutions. I have excellent technical skills enabling me to effectively analyze, design, and implement efficient and production-ready code at a reasonable cost.

CORE SKILLS

- 15+ years of hands-on experience in Front-End and Full Stack development life cycle (analysis, design, development, testing and maintenance)
- Extensive front-end development with **React (17/18)**, **Javascript (ES6+)**, **Typescript**, **Vue**, **Angular**, **NextJS**, Tailwind CSS, MaterialUI, Styled Components, Redux, Tanstack, Webpack, HTML5 / CSS3 / SCSS
- Strong back-end experience with **NodeJS**, **NextJS**, **GraphQL**, REST APIs, ExpressJS, NestJS, **.NET Core**, Spring Boot, Redis, DynamoDB, PostgreSQL and MongoDB
- Experienced with cloud technologies such as **GCP**, **AWS**, **Azure**, Kubernetes, CloudFoundry, Teraform
- Experienced with CI/CD tools such as **GitHub**, **Jenkins**, **CircleCI**, **GitLab**, Azure Pipelines, TeamCity and Docker
- Hands-on experience developing for **Hybrid Mobile**, **TV and Gaming Platforms** including iOS, Android, Ionic, IPTV, Set-top box (**Xbox Series X**, **PS5**, Samsung, Roku, Fire TV, Hisense Smart TVs)
- Working knowledge of **Python and ML** toolkits such as Numpy, Pandas, Matplotlib, Scikit-Learn and Apache Spark
- Strong experience using **Agile methodologies** (Scrum) and **Test-Driven Development (TDD)** with Jest, Mocha, Enzyme, React Testing Library and Istanbul
- Experience integrating authentication and third-party services (**JWT / OAuth**, 2FA, Contentful CMS, Lokalise)
- Experience leading teams, doing code reviews, architectural design and planning
- Ability to interface with clients, conduct interviews, scope technical solutions and mentor engineers

WORK EXPERIENCE

Connected TV Developer / Consultant

Jan. 2025 – April 2026

Stellar Elements/Amdocs

Toronto, ON

Project: Crave Expansion Hosted TV Application

Building the Crave Expansion Hosted TV Application for Bell Media, a streaming experience targeting Smart TV platforms and game consoles.

Technologies: React, NodeJS, NextJS, GraphQL, Microservices, AWS, TypeScript, HTML, CSS, Tailwind CSS, GitLab

Responsibilities:

- Architecting/building the Crave Expansion Hosted TV Application for Bell Media.
- Implemented new features using React, NextJS and Tailwind CSS which would run on Smart TV brands such as LG, Samsung, Hisense, Xbox, PS5.
- Lead the end-to-end development to launch on gaming platforms Xbox Series X and PS5.

Sabbatical

April 2024 – Dec. 2024

Not employed

Brampton, ON

- Took time off for newborn and home renovations.

Front-End Developer / Consultant

Mar. 2023 – Mar. 2024

Autodesk

Toronto, ON

Project: Autodesk Account Web Portal

Implemented product subscriptions and active trials pages that are part of the public facing Autodesk Account Web Portal used by customers to manage their products and licenses.

Technologies: React, NodeJS, NextJS, GraphQL, GCP, Kubernetes, Microservices, HIG, TypeScript, HTML, CSS, GitHub

Responsibilities:

- Lead the development of product subscriptions and active trials pages for the Autodesk Account Web Portal.
- Utilized React frontend libraries such as Redux, Styled Components, React Router, Axios, Storybook, React Testing Library and Istanbul and server libraries such as NextJS, ExpressJS, Webpack, body-parser, http, cors and dotenv.
- Worked with a design team to do UI/UX reviews and ensure the SPA React front-end is responsive to mobile users.

Full-Stack Developer / Consultant

Sept. 2022 – Mar. 2023

RBC

Toronto, ON

Project: Internal Provisioning and Automation Portal

Implemented enhancements on an existing internal React SPA used for sending requests, provisioning and automation, while assisting with a migration of a legacy CodeIgniter web application to a modern stack.

Technologies: Vue.JS, ReactJS, MEAN, GCP, REST API, TypeScript, HTML, CSS, GitHub**Responsibilities:**

- Implemented enhancements on existing internal React SPA used for sending requests, provisioning and automation.
- Helping to migrate a legacy web application written in CodeIgniter to a modern stack that uses VueJS and NestJS.
- Worked with a team to deliver new features based on requirements and attend weekly meetings with stakeholders.

Front-End Developer / Consultant

Jan. 2022 – July 2022

HP Inc.

Toronto, ON

Project: HP Support FAQ Microservice

Implemented and delivered a Frequently Asked Questions page using HP's microservice front-end architecture, localized across many languages.

Technologies: React, NodeJS, Veneer, TypeScript, Microservices, HTML, CSS, Azure Pipelines, GitHub**Responsibilities:**

- Lead the implementation and delivered the FAQ page using their microservice front-end architecture.
- Integrated with a third-party translation service called Lokalise for managing all content in several languages.
- Utilized React libraries such as Hooks, Styled Components, Isomorphic Fetch, Jest and Istanbul.
- Utilized Internal front-end framework called Veneer for components and layout of pages.

Front-End Developer / Consultant

Sept. 2021 – Jan. 2022

360Insights Inc.

Whitby, ON

Project: Channel Incentives Microservices

Implemented UI features and improved test coverage across several microservices powering 360Insights' channel incentives application.

Technologies: React, NodeJS, NextJS, Express, GCP, REST API, Microservices, HTML, CSS, GitHub**Responsibilities:**

- Implementing UI features on several microservices to enhance their application.
- Improving test coverage on existing microservices which use NextJS to serve endpoints.
- Utilized React libraries such as Styled Components, React Router, Axios, Jest, Enzyme, Mocha and Istanbul.

Consultant

June 2021 – Sept. 2021

ATB Financial

Calgary, AB

Project: Public-Facing Customer Banking Web Application

Implemented features on ATB's new public-facing web application for customers, focusing on core banking flows.

Technologies: React, NodeJS, NextJS, TypeScript, GCP, Kubernetes, GKE, REST API, Microservices, HTML, CSS**Responsibilities:**

- Implementing features on their new responsive public-facing web application for customers.
- Worked on the UI for core features like Direct Deposit, Transfers and Notifications.
- Utilized React libraries such as RxJS, Hooks, Jotai, NestJS, React Router, Axios, Jest, Mocha and Istanbul.

Consultant

Feb. 2021 – May. 2021

Scotiabank

Toronto, ON

Project: Wealth / iTrade 2FA Security Enhancement

Added two-factor authentication as an additional layer of security to the Wealth / iTrade application platform.

Technologies: React, NodeJS, Python, OpenAPI, 2FA, TypeScript, Microservices, HTML, CSS, Yarn, TeamCity, Agile

Responsibilities:

- Worked on their Wealth / iTrade application to add 2FA as an additional layer of security to their platform.

Consultant

July 2020 – Jan. 2021

Citibank

Toronto, ON

Project: CCB Consolidated Dashboard & Next Generation Lending UI

Implemented features for CCB Consolidated Dashboard, a web application for corporate clients, and set up a new project for the Next Generation Lending UI.

Technologies: NodeJS, Python, REST API, Microservices, HTML, CSS, Yarn, Docker, AWS, CircleCI**Responsibilities:**

- Implementing features for CCB Consolidated Dashboard, a web application for corporate clients.
- Set up a new project for the Next Generation Lending UI project.

Senior Javascript Engineer

Aug. 2019 – July 2020

RBC Ventures

Toronto, ON

Project: Ownr (ownr.co)

Implemented features for Ownr, a web application for incorporating new businesses, using a serverless front-end architecture on AWS.

Technologies: React, GraphQL, MEAN, MongoDB, NextJS, REST API, Microservices, HTML, CSS, Contentful CMS, Gatsby, Yarn, Docker, GCP, AWS, CircleCI**Responsibilities:**

- Implementing features for Ownr (ownr.co), a web application for incorporating new businesses.
- Serverless architecture for front-end, utilizing AWS services such as Lambda, S3, DynamoDB, CloudFormation.
- Integration with third-party services such as OnCorp, Founded, SendGrid and Logojoy.
- Adhered to agile methodologies (Scrum) to plan, analyze, design, implement, test and deploy builds on a biweekly basis.

Senior Full-Stack Agile Engineer

Aug. 2016 – July 2019

Tribalscale Inc.

Toronto, ON

Project: Multiple Client Engagements

Worked on web projects for well-known clients such as CIBC Live Labs, Radio.com, NBC, VersaPay, American Automobile Association (AAA), Manulife and LoyaltyOne (Airmiles) using Agile Methodologies (Scrum) and TDD.

Technologies: React, GraphQL, Vue, IPTV, Set-top Box (Roku), BrightScript, MEAN, MongoDB, NodeJS, NextJS, Python, REST API, HTML, CSS, NPM, Babel/Webpack, Istanbul, Jest, JWT/OAuth, AJAX, .NET Core, AWS, Azure, Concourse, CircleCI, GitFlow, TDD**Responsibilities:**

- Worked on web projects for well-known clients such as CIBC Live Labs, Radio.com, NBC, VersaPay, American Automobile Association (AAA), Manulife, LoyaltyOne (Airmiles) on projects using Agile Methodologies (Scrum) and TDD.
- Delivered a full web application for CIBC Live Labs using Spring Boot, React/Redux, Postgres on Azure.
- Implemented a Roku App for NBC Universal for delivering content.
- Delivered a mobile-first responsive web application using React/Redux, Bootstrap and RoR for VersaPay.
- Launched a public-facing website for LoyaltyOne (www.airmilesshops.ca) built using NodeJS, GraphQL, NextJS.
- Delivered an internal dashboard for Manulife using .NET Core and RabbitMQ with a microservice architecture.
- Built a payment gateway for AAA built on NodeJS, React and ASP.NET to make payments for their accounts.

Software Developer

Jan. 2016 – May 2016

Exchange Solutions Inc.

Toronto, ON

Project: Hybrid Loyalty Mobile Application

Implemented a hybrid mobile app for a client using the IBM MobileFirst platform running on Android and iOS devices.

Technologies: Android, iOS, Cordova, Angular, NPM, Babel/Webpack, Istanbul, Jest, JWT/OAuth, AJAX, Bower, Gulp, SASS, JavaScript, HTML5, CSS3, GitFlow**Responsibilities:**

- Implementing a hybrid mobile application for a major client using the IBM MobileFirst platform with Angular and NodeJS to run on Android and iOS devices.

Software Consultant

Oct. 2014 – May 2015

QuickPlay Media Inc. (Acquired by AT&T)

Toronto, ON

Project: Virtual Set-Top Box SDK

Implemented a Virtual Set-Top Box SDK for delivering Smooth Streaming content with PlayReady DRM on Windows 8.1 and Windows Phone 8.1, utilizing Microsoft Media Platform's Player Framework (MMPPF).

Technologies: Visual Studio 2013, .NET, WPF, Windows 8.1, Android Studio, TeamCity, GitFlow

Responsibilities:

- Implemented a Virtual Set-Top Box SDK for delivering Smooth Streaming content with PlayReady DRM on Windows 8.1 and Windows Phone 8.1 utilizing Microsoft Media Platform's Player Framework (MMPPF).
- Used best practices and design patterns (Service Locator Pattern (**SLP**), Inversion of Control (**IoC**) single instance pattern, Visitor, Strategy, Adaptor, Factory, and Abstract Factory Patterns). Utilized Microsoft Unity and SQLite.
- Developed several unit tests, integration tests and simulation strategies. Automated daily builds and weekly releases with automated tests with Jenkins and MSBuild.
- Packaged VSTB SDK for client with VSIX (Visual Studio Extension) installer and released bi-weekly at the end of scrum with accompanying documentation generated using Doxygen.
- Worked with Android team to help identify and fix critical issues, helped with testing HOOQ app

Software Engineer

Dec. 2012 – June 2014

mDialog Corporation (Acquired by Google)

Toronto, ON

Project: mDialog Smart Stream SDK

Implemented the mDialog Smart Stream SDK for Xbox 360, Windows 8 and Windows Phone 8 to deliver HLS video with dynamic ad insertion.

Technologies: IPTV, Xbox, HTML5, CSS3, BrightScript, NodeJS, MEAN, MongoDB, NPM, Babel/Webpack, Istanbul, Jest, JWT/OAuth, AJAX, Flash Builder, Lakeview, Xbox ADK, Windows 8, Windows Phone 8, ActionScript, TFS, Git

Responsibilities:

- Implemented the mDialog Smart Stream SDK for Xbox 360, Windows 8 and Windows Phone 8.
- Developed and successfully shipped a library for Windows 8 to insert mDialog ads into specific video content within the Windows 8 News and Finance Apps in collaboration with Microsoft AppEx.
- Built a web application using Play Framework to play HLS videos served off the mDialog platform.
- Building out new features on the Android SDK for live HLS video playback with overlay advertisements. Analytics tracking during playback and heart-beating done to ensure stream stays alive.

Interactive Developer

May 2011 - Dec. 2012

Digiflare Inc. (Acquired by Accedo)

Mississauga, ON

Project: IPTV Apps and SharePoint Client Sites

Built IPTV Xbox Live Apps and led SharePoint web development for enterprise clients.

Technologies: IPTV, Set-top Box (Xbox Live), SharePoint 2010/2007, SharePoint Designer, HTML5, CSS3, JavaScript, Visual Studio 2010, ASP.NET, C#, MS SQL Server 2008 R2, Xbox, Silverlight, Windows Phone 7, XSLT, Adobe Suite

Responsibilities:

- Worked in a team to build the CBC's Hockey Night in Canada and PBS IPTV Xbox Live Apps.
- Lead development of SharePoint 2010 sites for clients such as CPPIB, AMI, CNIB, CRISP, WestJet and OHTN.

EDUCATION

Data Science

2024 - 2026

Data Science Certificate Program

University of Waterloo, Waterloo, Canada

Completed a four-course certification in Data Science as part of WatSPEED

Foundations of Data Science, Statistics for Data Science, Machine Learning, Big Data Management Systems and Tools

Honors Computer Engineering

2005 - 2010

Bachelor of Applied Science

University of Waterloo, Waterloo, Canada

Artificial Intelligence, Computer Networks and Security, Software Engineering, Database Systems, Real-time Operating Systems, Data Structures and Algorithms, Distributed and Network Computing

ADDITIONAL COURSES

Machine Learning with Python

IBM

Credential ID: ONB6ZZK5CFFI

Issued December 2024

Python for Data Science AI & Development

IBM

Credential ID: EZW6T7XRHYFU

Issued December 2024

Build Infrastructure with Terraform on Google Cloud

Google Cloud

Credential ID: 14d6fc96-4cba-4318-a9f0-8355de8f7c91

Issued December 2024

Linear Algebra for Machine Learning and Data Science

DeepLearning.AI

Credential ID: 1QD1Y8OJB23T

Issued November 2024

Calculus for Machine Learning and Data Science

DeepLearning.AI

Credential ID: UPENLW2RHITK

Issued December 2024

CERTIFICATIONS

AWS Certified Cloud Practitioner - Associate

Credential ID: 1a9d43b54c1e445084d35a0b2b8cc0ba

Issued April 2025

Toronto, ON

AWS Certified Developer - Associate

Credential ID: XD70PD5K21FQQ9WT

Issued December 2018

Toronto, ON
